

Muhammad Alfian Ibnu Septiyan

Software Developer | Full Stack Web Developer

Magetan, East Java, Indonesia | +62 857 1085 9720 | septiyan140905@gmail.com | linkedin.com/in/muhammad-alfan-86b737282

PROFESSIONAL PROFILE

Informatics Engineering student and Software Developer focused on building practical web applications, dashboards, and SaaS products based on real user needs. Experienced in a software house apprenticeship, public-sector website development, and database-driven full-stack projects. Strong interest in full-stack engineering, API development, deployment, cloud fundamentals, and AI-enabled business solutions.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, responsive UI, UI implementation
Backend & API	Node.js, Express.js, Laravel, REST APIs, authentication basics, role-based access control basics
Database	PostgreSQL, MySQL, SQL fundamentals, Prisma, Sequelize
Tools & Cloud	Git, GitHub, Postman, Vercel, Render, Railway, basic AWS cloud concepts
AI/Data	Python fundamentals, basic AI, data science foundations, data visualization
Soft Skills	problem solving, communication, teamwork, adaptability, responsibility, documentation

WORK EXPERIENCE

Software Developer Apprentice | PT Marstech Global

Jan 2026 - Mar 2026 | Madiun, East Java | On-site

- Contributed to client-based web application development in a software house environment.
- Assisted frontend and backend feature implementation using JavaScript ecosystem and database technologies.
- Supported debugging, UI revisions, feature adjustments, and testing based on user and client requirements.
- Learned the practical software delivery workflow from requirement understanding, implementation, revision, and deployment preparation.

Tech/Skills: Next.js, JavaScript ecosystem, MySQL, Git, debugging

Web Developer | Polsek Bendo

Jun 2025 - Aug 2025 | Bendo, East Java | Freelance / Hybrid

- Built a public information website to support publication and communication needs for Polsek Bendo.
- Developed content pages for articles, reports, and public information updates.
- Implemented frontend and backend structure to support maintainable information management.
- Improved the website structure so public information could be accessed and presented more professionally.

Tech/Skills: Next.js, Express.js, PostgreSQL/MySQL, REST API, deployment

PORTFOLIO PROJECTS

UMKM Digital Kit / SaaS Portfolio | Self Business Project | In development

- Building a practical SaaS/product concept for MSME digital operations, catalog management, and online business presence.
- Designed as a full-stack portfolio project showing product thinking from idea, UI, database, API, and deployment planning.

Tech/Skills: Next.js, TypeScript, Tailwind CSS, Backend API, Database

SkillPath Kids / Education Assessment Platform | Academic / Portfolio Project

- Worked on an education-focused web application concept involving user roles, assessment flow, dashboard views, and data-driven features.
- Strengthened understanding of web application structure, role-based access, database relationships, and frontend/backend integration.

Tech/Skills: Next.js, React, TypeScript, REST API, database-driven application

Masjid Care SaaS | Self Business Project | Concept / In development

- Exploring a SaaS concept for mosque operations and community management with focus on practical digital workflows.
- Used as a learning project for product thinking, dashboard planning, and feature prioritization.

Tech/Skills: SaaS planning, dashboard, product strategy, web application

EDUCATION

Bachelor's Degree in Informatics Engineering | Universitas PGRI Madiun

Jul 2023 - Present

- Coursework focus: software development, databases, computer networks, system security, and information technology.

LICENSES & CERTIFICATIONS

- Dicoding - Memulai Pemrograman dengan Python
- Dicoding - Belajar Dasar Visualisasi Data
- Dicoding - Belajar Dasar Structured Query Language
- Dicoding - Belajar Dasar AI
- Dicoding - Belajar Dasar Data Science
- Dicoding - AWS Cloud Practitioner Essentials
- Dicoding - Belajar Dasar Manajemen Proyek

VOLUNTEER & ORGANIZATION

Documentation and Publications Committee | PORSENASMA UNIPMA 2025

Aug 2025 | Universitas PGRI Madiun |

- Supported live video technical operations for a national-scale campus event.
- Assisted technical coordination to help event documentation and live coverage run smoothly.
- Strengthened teamwork, field coordination, communication, and problem-solving under live event conditions.

Tech/Skills: Live video support, documentation, publication, teamwork
